Flock Automated License Plate Reader cameras (ALPRs) used by the Elk Grove Police Department continuously track and record our movements.

Elk Grove PD allowed more than 3,200 out-of-state and federal agencies to illegally search the Flock ALPR camera data here more than 1.3 Million times! This is prohibited by California Senate Bill 34 (2016) - no exceptions.

City of Elk Grove is paying over \$1.6 Million to Flock Safety for a system where 97% of searches AREN'T even made by Elk Grove entities. That outside percentage was more than 8 Million searches!

Search terms discovered through Public Records Act requests in Elk Grove and Woodland showed that Elk Grove residents' data was searched using PEOPLE characteristics, not just vehicle data, including RACE and GENDER as well as IMMIGRATION enforcement assistance searches.
